# Afope missions

# Valuing the organizational capital of our companies

- Our companies are facing a growing complexity of the world and of their own organisations
- In this complex world, our performance and development need to be sustainable, which requires a capacity of our organizations to give the right responses :
  - ✓ Strategic capacities to be prepared and able to transform our companies as soon as needed
  - ✓ Operational capacities in process management
- How to measure this organizational capital, as a strategic and intangible asset ?
  - ❖ A partnership with European Chair on Intellectual Capital Management

# Current model and work in progress

- Kick-off 2008
- First draft 2009
- Model V0 2010
- Contribution to Pr Bounfour's book « capital organisationnel » 2011

To improve this referential we are currently applying it in some case (due diligence) and testing it in a panel of companies
