Digital transformation of African Large firms

Mohamed SAAD, Président AUSIM
CIO, Bourse de Casablanca

Association des Utilisateurs des Systèmes d'information au Maroc (AUSIM)

New Tech and innovative solutions will determine the future of our continent

What can digital bring to Africa

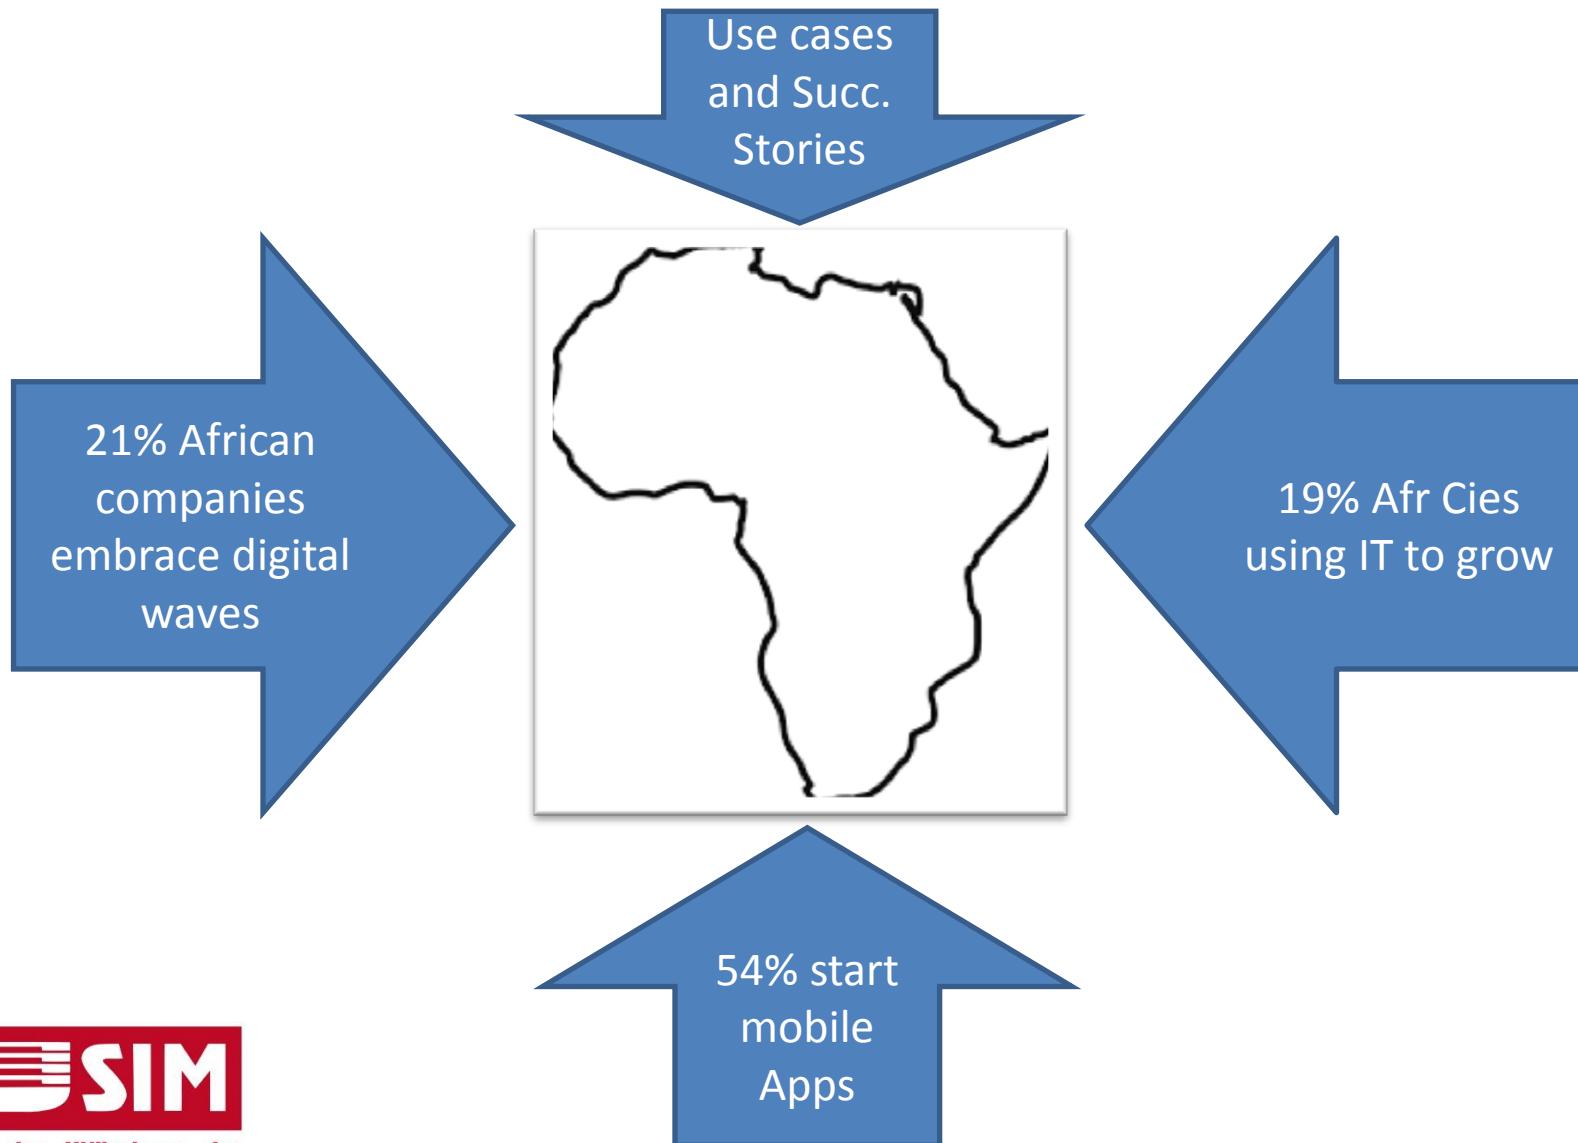

Digital can **empower** the lives of Africans and driving entrepreneurship, **innovation** and income growth.

Digital can **accelerate** the economic and social inclusion : Health, education, social services...

Today's trade and economic marketplace is set on a **digital playing field**, which allows African firms to quickly become **global competitors**.

Africa development in the digital age

Use Cases

Kenya, Uganda,
South Africa,
Tanzania, Ghana,
Nigeria, Cameroon
and DR Congo :
Medical records

Dig records in Kenya:
22%, doctor time per patient was reduced by **58%**, and patients spent **38%** less time waiting in the clinic

Zambia:
pocket sized chip card
that carries an
encrypted copy of a
patient's medical
history.

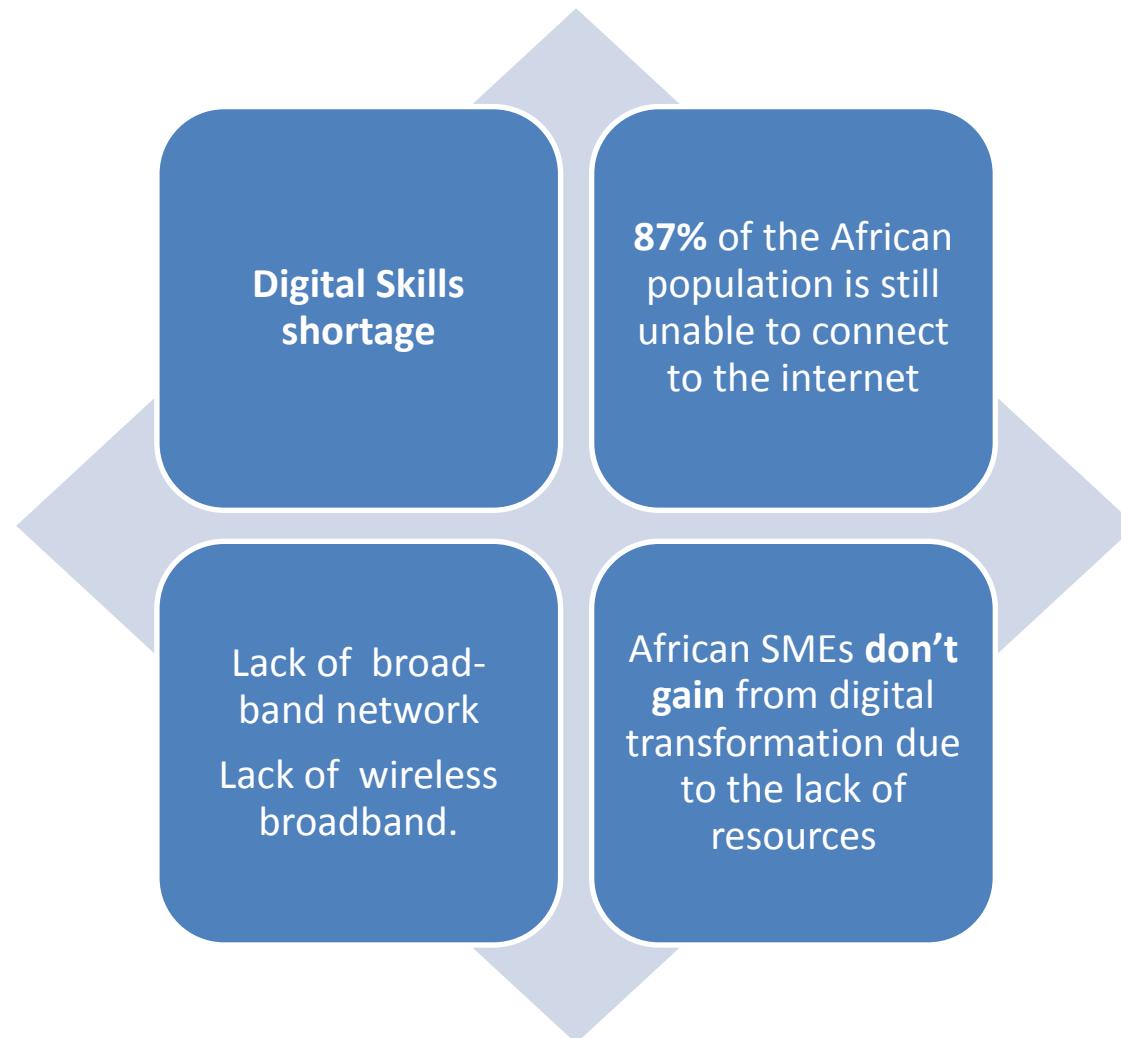

Use Cases

Kenya's M-Pesa
and online
banking:
For every **1000**
adults there are
close to **700**
(103 in 2003)

Tanzania:
first country to
deliver mobile
savings, loans and
interest bearing
products

Africa faces numerous challenges

Africa Digital trends

Cloud computing provides the infrastructure for the digital economy, will enable African governments and companies to have all the digital access and storage they require on a pay per use basis.

Digital in Morocco: overview

Morocco ranked **second** only to South Africa in terms of "**internet readiness**"

Increased broadband access nationwide by extending fibre-optic networks into more isolated regions of the country and to roll out a 4G network.

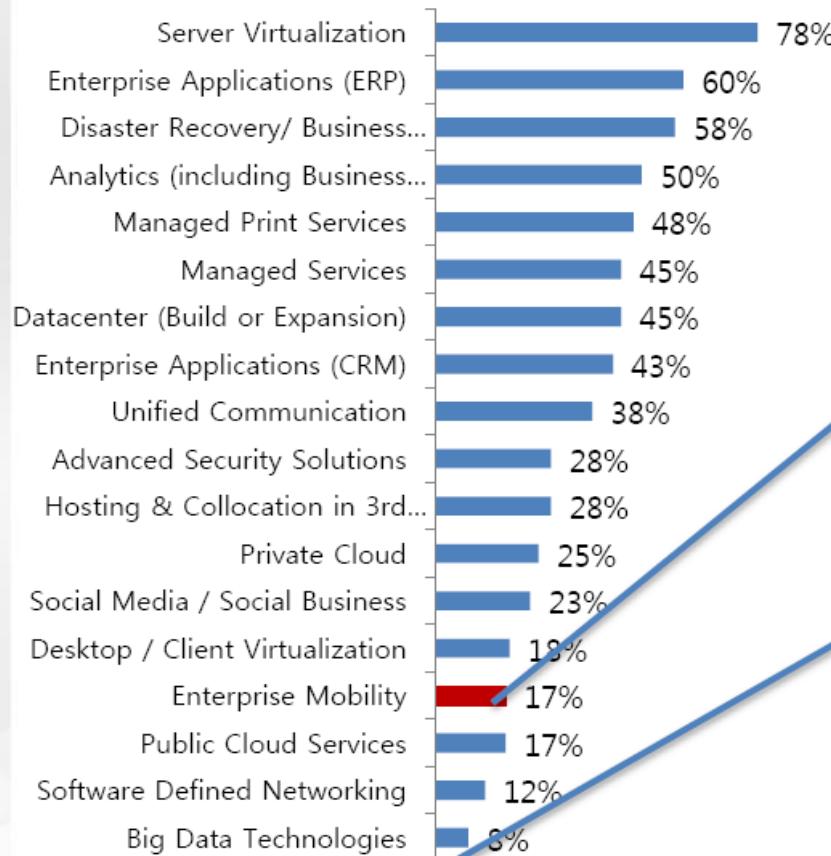

Most of **Tax collection** are done on line

the number of mobile phone subscribers is the **highest** in Africa

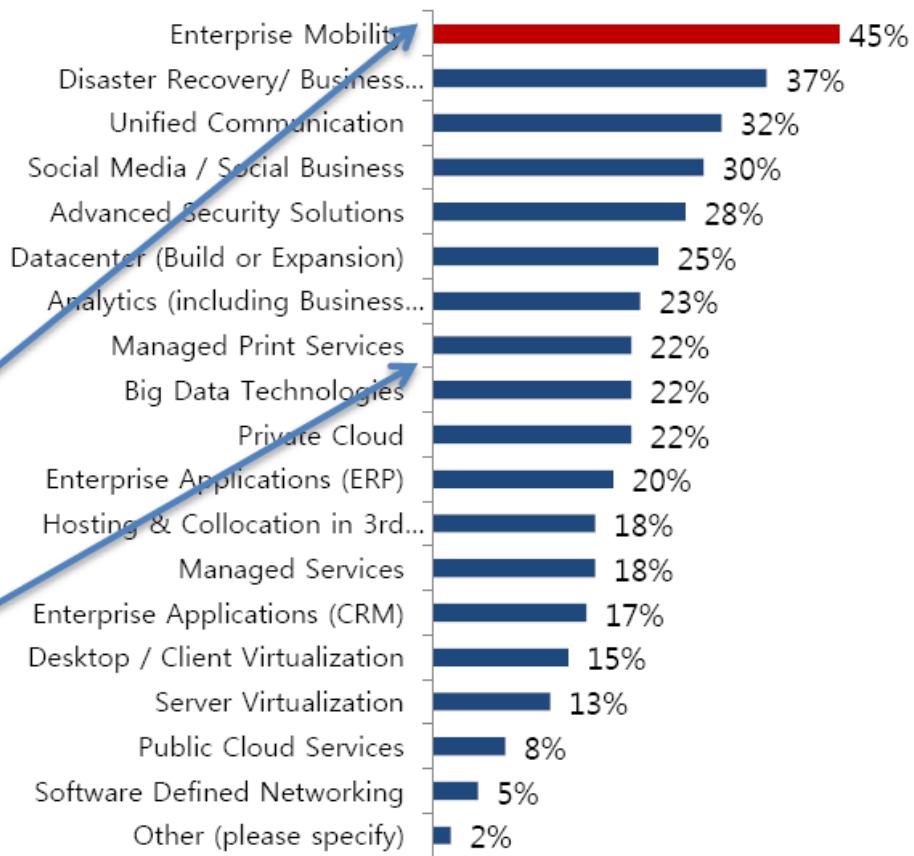

The **digital economy's** value-added comes from the **BPO segment**. The offshore industry which includes call centers and other BPO activities

Major Trends

Technologies Implemented in 2015

Technology Priority for 2016

Top 10 Morocco IT predictions 2016

- IT security still a focus in 2016: New environments, new threats
- Mobility will attract more investments
- Digital transformation will gain more attention in Finance, Media and public sector
- E-Commerce will become more and more mobile
- Smart initiatives will be driven by private sector mainly in utilities and energy.
- Organizations will invest in Social networks considered as a business tool
- Organizations will invest seriously in Big Data technologies
- Virtualization's last mile in Morocco
- CMO's Evolving Into CTO's; CDIO are pointing noses
- Digital transformation initiatives will be unmanageable due to lack of portfolio management skills
